Thread Does anyone have a downloadable version of the manual for the original Blackmagic Intensity card? I'm talking about the old PCI-e version. Not the pro version, but the original with only two HDMI ports. I don't need any help. I know the manual will be largely outdated. I just love having the manuals for my stuff. Is this what you're looking for? Attached miniatures Losing your sense of humor.... is nothing to laugh about. Thanks, but no. I am following the manual specifically for the old Intensity map, released circa 2006/2007. It will look something like the one I've confirmed, that's for the Intensity Pro. I'm looking for the old non-pro version Attached Thumbnails Thanks, but no – that manual is for the Blackmagic Intensity Pro. I want the manual for the Blackmagic Intensity. I don't have a model number. Attached thumbnails Sorry, I only just saw this post. Yes, that's the map - but that's not the manual. That's just a guide showing how to use it with a particular JVC deck. BM has a terrible way of making access to their manuals, they pack it with advertising style materials, in most cases you have to browse hundreds of pages to get to your specific model, and if you find it there isn't much to read just basic setup. Their manual is called BM Desktop Video software pack. It comes in a zip file with drivers and applications, download and follow the pdf file installation instructions, there is no such hardware manual other than a basic setup diagram that is clear in your case. They have Apple approach when it comes to their devices. Everything is owned. Originally posted by dellsam34 Their manual is called BM Desktop Video software pack. The Intensity Pro definitely had one (I uploaded it further up in this thread) and that was only a few months after the original intensity. Both share the same packaging design. Anyway, it's not a big deal. I don't really need it.
